

Sunny Days

Jackie DeShannon

Sunny days, come here close beside me
And brighten all the darkness that settled by my life
Whistle songs, breezes blow so happy
And sing a little tune
And stay on, oh, please stay
Sunny days

Sunny days driftin' by my window
Remind me of a love that sang a little while ago
Happy times when days were not so lonely
And two are one
A peacefulness I always thought would stay
Sunny day

Movin' on through an empty winter sorrow
Through my hopes and dreams that seem to drift away
And comin' down to my tears of joy and laughter
I look away and see the light
And hope that someday soon I'll catch the wave
And on my way, oh, oh, on my way

I'll see love's sunny days with the rain and thunder
Uncertain of my future but I'll pass you by someday
And dream again of the joy and laughter
And of the happiness
That might just come my way
Sunny day

Oh, please stay, sunny day
Won't you please stay, sunny day?
