

Stars

Jackie Thomas

We are stars
That won't come down
We are flaming balls of fire that won't burn out
Feel the heat
Light up our skin
Let our atmospheres collide and this begin
You and me could be shining stars

Our lives move at the speed of light, be our life
Fire burning up the skies
It's the gravity that keeps me safe and sound
Our hearts beat murmuring ajar, you don't care
You can take me even higher, with me easily completely off the ground

You've been chasing nonsense
You've been chasing nonsense
In our dreams, taking me
In my life never have I felt so free

We are stars
That won't come down
We are flaming balls of fire that won't burn out
Feel the heat
Light up our skin
Let our atmospheres collide and this begin
You and me could be shining stars
Oh-a-oh
You and me could be shining stars
Oh-a-a-oh

Holding tight we begin again falling in deep
For the very first time
Take me further than we've ever been before
I tried, we go spinning round, up and down
Things running with desire
Bring it all above with our love deep in score

You've been chasing nonsense
You've been chasing nonsense
In our dreams, taking me
In my life never have I felt so free

We are stars
That won't come down
We are flaming balls of fire that won't burn out
Feel the heat
Light up our skin
Let our atmospheres collide and this begin
You and me could be shining stars
Oh-a-oh
You and me could be shining stars
Oh-a-a-oh

It could be our last
But we'll come out tonight
Getting lost but we'll come out tonight
We could be the last but I'll be bring you to light

We are stars
That won't come down
We are flaming balls of fire that won't burn out
Feel the heat
Light up our skin
Let our atmospheres collide and this begin
You and me could be shining stars
Oh-a-oh
You and me could be shining stars
Oh-a-a-oh
You and me could be shining stars
