

# Starlight

Michael Jackson

There's indication  
That someone else is standing on the ground  
Across the nation  
There's always people trying to pull you down  
Now is the time  
For us to spend this evening close together  
Deep in the night  
We're holding on to someone else's dream  
Girl, can't you see?

We need some starlight, starlight sun  
There ain't no second chance  
We got to make it while we can  
You'll need the starlight, some starlight sun  
I need you by my side you give me  
Starlight, starlight, starlight, yeah

They're out to get you  
There ain't no issue, you're acting like a fool  
Love can possess you  
And make you see that heart is gonna move  
High in the night  
This magic's gonna keep us close together, yeah  
We'll start to fly  
'Cause this is the beginning of your life  
Baby, tonight

Give me some starlight, starlight sun  
With this, the only chance  
We've got to make it while we can  
You'll need the starlight, starlight sun  
I need you by my side so give me  
Starlight, starlight, starlight

Light up the world, let the love start take charge of this masquerade  
Take your delivery and show me that this is no lie  
Give me your starlight tonight

There's indication  
That someone else is standing on the ground  
Across the nation  
There's always people trying to pull you down  
Now is the time  
For us to spend this evening close together  
Deep in the night  
We're holding on to someone else's dream  
Girl, can't you see

We need some starlight, starlight sun  
There ain't no second chance  
We've got to make it while we can  
You'll need the starlight, starlight sun  
I need you by my side so give me  
Starlight, starlight  
Starlight, starlight sun  
There ain't no second chance  
We've got to make it while we can

You'll need the starlight, starlight sun  
I need you by my side so give me  
Starlight, starlight  
Starlight, starlight sun  
There ain't no second chance  
We've got to make it while we can  
You'll need the starlight, starlight sun  
I need you by my side so give me  
Starlight, starlight, starlight

Give me, give me that sun  
Give me, give me that sun  
Give me, give me that sun, ooh yeah  
Give me, give me that sun, ooh babe  
Give me, give me that sun, we can't be together  
Give me, give me that sun, starlight sun  
Give me, give me that sun  
Give me, give me that sun, ooh babe  
Starlight (starlight)  
Starlight (starlight)  
Starlight (starlight)  
Starlight (starlight)  
Starlight  
Starlight  
Starlight
