Jackson Wang

We go like left, right, look up, get down and rock  
1, 2 and west, east, north, south, get down and rock  
Yeah, come and hit that two-step with the man in the mirror  
And he said left, right, look up, get down and rock

I'm catching this fever, like I don't need no meds  
Oh please don't let it leave me doctor don't put me to bed  
Don't test my funk cause the good foot don't tap  
No ones looking  
I don't need nobody here

We go like left, right, look up, get down and rock  
1, 2 and west, east, north, south, get down and rock  
Yeah, come and hit that two-step with the man in the mirror  
And he said left, right, look up, get down and rock

Stay low, tip toe, shadows trying to creep on me now  
Move slow, wind blows, pennies in my hand but my wings grow  
Spotlight, all bright I know they can't hold it down  
I feel good like James knew that I would now

Ahh  
What am I doing here  
All I need is a mirror

We go like left, right, look up, get down and rock  
1, 2 and west, east, north, south, get down and rock  
Yeah, come and hit that two-step with the man in the mirror  
And he said left, right, look up, get down and rock

We go like left, right, look up, get down and rock  
1, 2 and west, east, north, south, get down and rock  
Yeah, come and hit that two-step with the man in the mirror  
And he said left, right, look up, get down and rock
