

Feel

Jacob Collier

Stay for a minute
Let me hold you in my heart
You love me, don't you baby?
So don't you rush away, rush away

You and I, wide awake
With the sky falling down
As we wait for the morning
Is there a place in the stars
Where the sky goes to sleep?
We got no way of knowing

You make me feel (When it all falls down)
Feel (Turn it back around)
You make me feel (When it all falls down)
Feel (Turn it back around)
But you, you make me feel so young
Yeah, you, you make me come alive

This I do adore
Stay forever more
Take me to the floor
Leave me wanting more
I never felt this way before
You make me feel like I'm new

Breathe for a moment
Let me wash away all your cares
(Let me wash away all your cares)
You know I gotchu baby
(You know I gotchu baby)
So don't you rush away, rush away

You and I, wide awake
With the sky falling down
In the dark of the morning
Is there a place in the sky
Where the stars go to sleep?
They've got no way of glowing

You make me feel (When it all falls down)
(All I wanna do is call your name, call your name, call your name)
Feel (Turn it back around)
You make me feel (When it all falls down)
(All I wanna do is call your name, call your name, call your name)
Feel (Turn it back around)
But you, you make me feel so young
Yeah, you, you make me come alive

This I do adore
Stay forever more
Take me to the floor
Leave me wanting more
I never felt this way before
You make me feel like I'm new

You make me feel

You make it real
You make me feel
You make it real
