

# Off The Ground

Jacob Latimore

No point controlling my emotions  
I'm gonna let them run free  
Take a dive into your sea  
Act of suppression is distortion  
If all that we hold is unique  
Why let go of something so sweet?

'Cause I can't sit here  
Face to face, eye to eye  
And pretend like it's fine  
If I keep my guards high  
And I know you said  
I can take all the time  
And you'll wait for a sign  
But I can't let this go by

So I'm  
Getting up off the ground  
Lifting up off the ground  
Feeling so magnetic  
No other option but to let it  
Get us up off the ground  
Lift us up off the ground  
If I want you around  
I'm lifting us off the ground

Anticipating change of seasons  
To see if my feelings do the same  
But I've been here singing your name  
And I don't know if this is an error  
But I'm here picturing us together  
Don't think I'm gonna get any better than you

'Cause I can't sit here  
Face to face, eye to eye  
And pretend like it's fine  
If you keep your guards high  
And I know I said  
You can take all the time  
And I'll wait I'll be fine  
But I can't be that guy

So I'm  
Getting up off the ground  
Lifting up off the ground  
Feeling so magnetic  
No other option but to let it  
Get us up off the ground  
Lift us up off the ground  
If I want you around  
I'm lifting us off the ground

I know you know I fear being vulnerable  
When it rains without you, days without you are miserable  
Might have to just, might have to just let my feelings show  
Might have to just, might have to just let my feelings show

So I'm  
Getting up off the ground  
Lifting up off the ground  
Feeling so magnetic  
No other option but to let it  
Get us up off the ground  
Lift us up off the ground  
If I want you around  
I'm lifting us off the ground

So I'm  
Getting up off the ground  
Lifting up off the ground (off the ground)  
Feeling so magnetic  
No other option but to let it (feeling so)  
Get us up off the ground  
Lift us up off the ground  
If I want you around  
I'm lifting us off the ground
