

# Planet Lonely

Jacob Sartorius

Instead of asking "will you hold my hand?"  
Me, myself, and I will attend this dance alone  
I'm contemplating getting out of bed today  
Cause I'mma probably do what I did yesterday  
Feelings get hurt  
Walk myself out in a stretcher  
30 minutes later I feel blessed no stress here  
On a planet got no understanding  
Couldn't plan it all the shit that's happened to me

That's life on planet lonely  
Nobody's ever held me  
Screaming "can you please save me?"  
Never mind let me stay lonely

That's life on planet lonely  
Nobody's ever helped me  
Screaming "can you please save me?"  
Never mind let me stay lonely

Wonder if there's life out on earth  
I've never been there before  
Cause I don't know where it is  
I think it's light years away  
I've got no tools or supplies so it's been hard to provide  
Let alone tryna fly  
I killed my dreams to survive

No one's here  
No one's here  
Gotta wipe my tears and walk this life alone  
No one's here  
No one's here

That's life on planet lonely  
Nobody's ever held me  
Screaming "can you please save me?"  
Never mind let me stay lonely

That's life on planet lonely  
Nobody's ever helped me  
Screaming "can you please save me?"  
Never mind let me stay lonely

(No one's here, no one's here)  
(No one's here, no one's here)
