

Special

Jacob Whitesides

(Woah)

You pushin' every button just to test me
You actin' like you love me then you just leave
Trying to run away but I can't move my feet
It's like a bad dream on repeat

Watch me fallin' apart
You pick me up halfway
Enough to make me stay
Fallin' apart
You make me look stupid
Your love is abusive

If you didn't need me
You could've just straight up said that
You're mixing up my feelings
Cause all of my strings are still attached
When'd you get so evil
You drop me just to pull me right back
If you didn't want me
Why'd you have to go and make me feel so
Special, special, special, special
Special, special (why'd you have to go and make me feel so)
Special, special
Special, special, special, special, special

You're there to fix the problems that you made
It's not a win if you fix what you break
You take me so high, you take me so high, then you run and hide
Why you gotta hurt me so right

Watch me fallin' apart
You pick me up halfway
Enough to make me stay
Fallin' apart
You make me look stupid
Your love is abusive

If you didn't need me
You could've just straight up said that
You're mixing up my feelings
Cause all of my strings are still attached
When'd you get so evil
You drop me just to pull me right back
If you didn't want me
Why'd you have to go and make me feel so
Special, special, special, special
Special, special, special, special

Beg, steal and borrow
Me to the grave
Promise tomorrow
Then you leave me today, babe
Beg, steal and borrow
Me to the grave
Promise tomorrow
Then you leave me today

If you didn't need me
You could've just straight up said that
You're mixing up my feelings
Cause all of my strings are still attached
When'd you get so evil
You drop me just to pull me right back
If you didn't want me
Why'd you have to go and make me feel so
Special, special, special, special
Special, special (why'd you have to go and make me feel so)
Special, special
Special, special, special, special

Special, special, special, special
