

Einstein

Jade Bird

I am no Einstein or prodigy
My mind's the same as anybody's
I'm no detective, can't find my own keys
But I think you've stopped loving me

I have no magic, can't move you near
Can't make the distance just disappear
I'm no actor, won't make a scene
But I think that you're lying to me

Might be a fool for waiting to see
I'm not a scientist, I have no degree
I'm not a genius, don't have to be
But I know that you're leaving me

You are the answer, you are the start
You are the lighthouse in the dark
You are the water when the rain stops
Now you're the one who let me fall apart

Might be a fool for waiting to see
I'm not a scientist, I have no degree
I'm not a genius, don't have to be
I know that you're leaving me

I'm no teacher, don't know what to do
Love can't be learned, it's something you choose
So I should just leave you, let you be free
So you can never leave me
