

That's What Love Looks Like

Jade Eagleson

I was standing there holding a flashlight
Talking to my old man
We were turning wrenches on a Chevrolet
And sipping from a couple beer cans
He asked me 'bout the girl I been seeing
I said, dad I think she's the one
Then he wiped off the grease, looked back at me
And said, remember son

To do anything for your baby
You'll have your first big fight but you'll make it
It's learning not to have the last word
And to swallow your pride
It's making time for a date on a Friday
Up middle of the night with a baby
Naw things ain't always easy in this crazy life
But you treat her right and she'll always be by your side
Yeah that's what love looks like

White dress and gold bands
You took my last name
We tied on cans and window paint
As we drove away
Seems like that was yesterday
Girl time sure goes fast
Now we've made a few trips around the sun
And I've learned a whole lot from that

I'd do anything for ya baby
We had our first big fight but we made it
I learned not to have the last word
And to swallow my pride
It's making time for a date on a Friday
Up middle of the night with a baby
Naw things ain't always easy in this crazy life
But I'll have your back and you'll always be by my side
That's what love looks like

Now we got a couple kids of our own
My old Firebird had to go
If I could turn back time I wouldn't change a thing
No, I wouldn't change anything

I'd do anything for ya baby
We had our first big fight but we made it
I learned not to have the last word
And to swallow my pride
It's making time for a date on a Friday
Up middle of the night with a baby
Naw things ain't always easy in this crazy life
But I'll have your back and you'll always be by my side
Yeah that's what love looks like

That's what love looks like
That's what love looks like
