

Bulletproof

Jade Novah

The bullets fired one by one I saw them
The wounds came two by two gotta stop
But the pain slows
When you stay close

My tears fell three by three you wiped them
You gave me what I need to fight
'Till the rain slows
And the pain goes

I need you in my space like Jupiter needs Mars
I'm elevated I finally made it to the stars
It's like heaven baby
Ever since you came and you saved me baby

You give me magic
You give me beautiful
Can't imagine
Being without you
When I'm with you
I feel bulletproof

Nothing can stop us
Nothing can bring me down
Can't imagine
Being without you
When I'm with you
I feel bulletproof

The battles come one by one we fight them
The bombs fall two by two all night
But the rain slows
When you stay close
This thing called loves a suicide mission
It tried to shoot me down kept missing
You caught me
Now we're floating

I need you in my space like Jupiter needs Mars
I'm elevated I finally made it to the stars
It's like heaven baby
Ever since you came and you saved me baby

You give me magic
You give me beautiful
Can't imagine
Being without you
When I'm with you
I feel bulletproof

Nothing can stop us
Nothing can bring me down
Can't imagine
Being without you
When I'm with you
I feel bulletproof

I need you in my space like Jupiter needs Mars
I'm elevated I finally made it to the stars
It's like heaven baby
Ever since you came and you saved me baby

You give me magic
You give me beautiful
Can't imagine
Being without you
When I'm with you
I feel bulletproof

Nothing can stop us
Nothing can bring me down
Can't imagine
Being without you
When I'm with you
I feel bulletproof
