

Conspiracy of Science

Jaded Heart

Conspiracy of science
Forgotten tales remembered
Living lies within your heart
No time to turn around

Raise above this living hell
Beware of the shadows
Take now these chains off
Can you taste the fire?

Somewhere there's a reason I cannot explain
You tell us how to run our lives
I just can't stand it washed away
Someday for this you got to pay

Can you make our brains work?
It's needed for survival
We've become our own disease
Standing on our knees

You got nothing that I need
We were better off alone
Take now these chains off
Can you taste the fire?
