LUCY!

Jaden Smith

Why you up on this hill by yourself?
My Lucy's coming to see me
No, she's not
She'll be up here
Look, there she is, "Lucy, over here"

Another special date
I thought we'd just hallucinate
We'd order wine and grapes
Under the weeping willow tree

Saturday makes the pain just go away
(The pain just goes away)
I kiss your lips
And then the rest, well, is history
You are my shining star
Girl, you got that special thing
So could it be who you are
It always gets the best of me

I need all, what you got
I need all, check your phone
I then call, you know my mind since the morning time

We're floating over the hills, you're gorgeous
Let's just stay here till the morning
A couple of pills and I'm balling
I'm dying to care for you always
Shows you pictures of us in the hallway
I gave you that ring from my soul
I love you so much more than you know

Lucy from Hidden Hills took my heart, hid it in the hills
Lucy from Hidden Hills took my heart, hid it in the hills
Lucy from Hidden Hills took my heart, hid it in the hills
Lucy from Hidden Hills took my heart, hid it in the hills
