

Out In The Cold

Jagged Edge

Somewhere in that sacred heart
My name's written in blood
My hand will always touch your skin
There's a picture of me in your immaculate eyes

You can always run run run
I won't behind you
You can always try
You know I'm inside you

You left me standing alone in the cold
I still want you back with me
You left me standing alone
Out in the cold

Wakin' up with a lonely heart
I spend my days wishing for you
There's a secret bond between us
I know you'll come coming back to me
Baby

You can always run run run
I won't behind you
You can always try
You know I'm inside you

You left me standing alone in the cold
I still want you back with me
You left me standing alone
Out in the cold
