

Elements

Jai Waetford

Once blowing strong in the valley
The vibing air says you miss me
And it's been this way since the start
It's coming straight from the heart
The clouds overhead overwhelm me
The love that we share moves around me
And it's been this way since the start
It's coming straight from the heart

This time we'll stay in control
This time I'll make sure you know
Wherever you go, I go
These feelings conjuring a storm
Lightning flashes, it's all begun
Wind, fire, rain and snow

We're moving elements
We're stronger than anything
Using our hearts again
Cause we're moving elements

Like it's a needle on the ground, never ending
And the path that we take is always winding
It's been this way since the start
It's coming straight from the heart

This time we'll stay in control
This time I'll make sure you know
Wherever you go, I go
These feelings conjuring a storm
Lightning flashes, it's all begun
Wind, fire, rain and snow

We're moving elements
We're stronger than anything
Using our hearts again
Cause we're moving elements

This time we'll stay in control
This time I'll make sure you know
Wherever you go, I go
These feelings conjuring a storm
Lightning flashes, it's all begun
Wind, fire, rain and snow

We're moving elements
We're stronger than anything
Using our hearts again
Cause we're moving elements
