Flash (Pointe Noire)

Jain

I can't forget the time that I've passed in your backyard
In this wooden house we're all waiting in line
Just to record a track, we had to make it fast
We had only one shot to sing it oh like what

Show me more and more
Show me just a little more
Show me the way I should take to see it all
Show me more and more
Show me just a little more
I gotta stand up so I can see your kingdom

Just a mark in your machine, it's all we ever need
To show me melodies proudly run by your country
You still following me, it's where I felt so free
I remember the time when we wear oh like what

Show me more and more
Show me just a little more
Show me the way I should take to see it all
Show me more and more
Show me just a little more
I gotta stand up so I can see your kingdom

We were the only ones back in a Congo town
To feel this magic [?] sound down into our soul
Between my classes, after my classes
In this wooden house I would come to sing like what

Show me just a little more (more)
Show me just a little more (more)
Show me just a little more (more)
Show me just a little more (more)

Show me more and more
Show me just a little more
Show me the way I should take to see it all
Show me more and more
Show me just a little more
I gotta stand up so I can see your kingdom
Show me more and more
Show me just a little more
Show me the way I should take to see it all
Show me more and more
Show me just a little more
I gotta stand up so I can see your kingdom
