

All That I Needed Was You

Jake Bugg

Crawled to bed, 10 AM
Chasing strangers out my head
I tell myself, just one more time
But it never fills the emptiness inside

All that I needed was you
Deep in my heart I always knew
All my life I've been searching for something more
But all that I needed was you

I woke up
The sun had set my mind so heavy with regret
I lost myself, God knows when
But I'll always find my way back here again

All that I needed was you
Deep in my heart I always knew
All my life I've been searching for something more
When all that I needed

Was you from the start?
Like the night needs the stars
And the goal of it all is to feel

All that I needed was you
It takes a lot of hurt to see the truth
All my life I've been searching for something more
But all that I needed, all that I needed was you
