

Maybe It's Today

Jake Bugg

She's the light that lives in my mind
She's the love that keeps walkin' by
Givin' you all my time
She's got some guy
Who's kinda dry
Says the right things
But they're all a lie
She knows it ain't right

But you don't even know my face
Standin' image in the rain
'Cause my heart there's only you and I, I, I, I

Maybe it's today
I get to say that I love you the most
I'll be there where you go
And you'd always know that I love you the most

Every day I'm findin' it hard
She makes it alright, she's healin' the scars
That pull me apart

But you don't even know my face
Standin' image in the rain
'Cause my heart there's only you and I, I, I, I

Maybe it's today
I get to say that I love you the most
I'll be there where you go
And you'd always know that I love you the most

I love you the most
I love you the most
I love you the most

Well, maybe it's today
I get to say that I love you the most
I'll be there where you go
And you'd always know that I love you the most
