

# Mile High

James Blake

Don't wanna see me by yourself...

We on a drive, looped in  
Two seat ride, coupé in  
Who gon' slide? Who's in?  
Big rocks 'round of ten  
Fleetwood down, new sand  
Two seat ride, coupé in  
Don't leave 'round loose ends  
Don't be around new friends, yeah

We just be mile high clubbin'  
I'm on a thousand miles runnin'  
Hit it, go downtown Sunday  
Then move it uptown Monday

Don't wanna see me by yourself...

If I give it to you, will you leave?  
Tell it to you, will you speak?  
Got it tatted on my sleeve  
Fell in love oversea  
Ass fatter than a peach  
Ocean water kinda deep  
Rolling up at the reef  
Put me down, shake the sleep

Flashin' light, do it sell?  
Flashin' light, do it sell?  
40 days, 40 nights  
Feel like a holy night  
The lesson's always there  
That less is always more  
And in the back and forth  
I'm not keeping score  
Lesson's always there  
That less is always more  
When you're alone with me  
You never come up short  
You never come up short  
(Never come up short, never come up short, never come...)

Watch the fan as it spins  
In my arms pretend  
Don't know where you start  
And where I begin  
Like I found myself an imaginary friend  
And when we stay in  
I'm missin' everything

We just be mile high clubbin'  
I'm on a thousand miles runnin'  
Hit it, go downtown Sunday  
Then move it uptown Monday

Don't wanna see me by yourself...

Hi-vest, never seen  
Low-key as it's been  
Fell in love overseas  
Fell in love like it's easy  
Put to sleep without dreams  
Under the moonbeam  
Call you for no reason  
Hold on like it's greasy

Flashin' light, do it sell?  
Flashin' light, do it sell?  
40 days, 40 nights  
Feel like a holy night  
The lesson's always there  
That less is always more  
And in the back and forth  
I'm not keeping score  
Lesson's always there  
That less is always more  
When you're alone with me  
You never come up short  
You never come up short  
(Never come up short, never come up short, never come...)

See me by yourself...
