

# She Looks at Me

James Durbin

When she looks at me  
One second's start stops my heart  
And next one sets it free  
If we never heard a single word I'd still wait and see  
If she looks at me

When I see  
There's a thousand colors in our galaxy  
And there's no end to what I imagine we could be  
Falling faster now on zero gravity  
I know what it means

When she looks at me  
How in this whole world do I deserve to be her anything  
I feel loved, afraid, a thousand ways, it's still hard to leave  
As she looks at me

When I see  
Every star has turned to shine to you and me  
I feel your love with every second that we breathe  
Falling faster now on zero gravity  
I know what it means  
When she looks at me

When she looks at me  
It's all truths, no lies, no silver linings, it's where we're meant to be  
The last second stops, the night be lost if I never turn to see  
If she looks at me

When I see  
There's a thousand colors in our galaxy  
And there's no end to what I imagine we could be  
Falling faster now on zero gravity  
I know what it means

When I see  
Every star has turned to shine to you and me  
I feel your love with every second that we breathe  
Falling faster than we ever could have dreamed  
I know what it means  
When she looks at me
