

Closer

James Hersey

Closer (I want you closer, I want you close)
Closer, closer (I want you closer, I want you close)

Every time I
Say goodbye I
Hope that you don't
Change your mind
When I'm gone it's the
Hardest thing, no I
Can't replace the way I feel

When the sun goes down and you reach for me
Every single word that you speak for me
Girl, I want the love that you keep for me
Every single moment
I just want you closer

I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer

Sunrise out my window
Airplanes in the sky
Waking up don't feel the same
Not without you by my side
And all the different
Languages you speak
Can't describe the way I feel

When the sun goes down and you reach for me
Every single word that you speak for me
Girl, I want the love that you keep for me
Every single moment
I just want you closer

I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer

Closer (I want you closer, I want you close)
Closer, closer (I want you closer, I want you close)
Closer (I want you closer, I want you close)
Closer, closer (I want you closer, I want you close)

When I lay down, when I wake up
When I can't get to sleep so you stay up with me
When I can't find the words for my feelings
But you still somehow heard what I needed

I just want you closer
I just want you closer

I just want you closer
I just want you closer
I just want you closer
I just want you closer

I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer
I just want you closer

Closer (I want you closer, I want you close)
Closer, closer (I want you closer, I want you close)
Closer (I want you closer, I want you close)
Closer, closer (I want you closer, I want you close)
