

# We Might Fall

James Hersey

I've got the feeling that I might be back  
Can't stop thinking about the nights we had  
Not a moment that I might regret  
Remember almost every word you said to me

The way you talk about your past  
The way that you use your hands to speak  
Your body like a part of your soul  
Makes you unforgettable to me

I know I said I might never fall in love again  
And you said that you're never gonna need a man, no

But we might fall in  
We might fall  
We've got so much left to give  
We might fall in  
But we might fall in  
We might fall  
We've got so much love to give  
We might fall in

I got the feeling that it won't be long  
Before I know that you're the only one I need  
A moment that I'll never forget  
Waking up to find you in my bed with me

The way you talk about your friends  
The way that you move in close to me  
Your body like a part of your soul  
Makes you unforgettable to me

I know I said it's not time for me to love again  
And you said love's a thing we'll never understand

But we might fall in  
We might fall  
We've got so much left to give  
We might fall in  
We might fall in  
We might fall  
We've got so much love to give  
We might fall in

Fall in  
Fall...

We might fall
