

Right Back

James Ingram

There's been a special place
Try to hide, but the memory of an angel
Won't let go, where can I run away
I've got to slow down
Just to let you know
That I feel you everywhere I go
You're so near I can see your face

Right back... in my mind
Oh yeah, right back
Right back... in my mind
Right back, pretty baby you do to me
Right back, right back in my mind again
Right back, right back in my mind again

Dancin' a step at a time
See you move in the shadow of a love spell
Then suddenly the flashback is clear to me
I can't forget even though I say I do baby
Your tender smile got me runnin' around in a daze, honey
I'm still feelin' your lovin' trace

Right back... in my mind
Right back, right back
Right back... in my mind
Right back
Right back, right back in my mind again
Right back, right back in my mind

I can feel the rushes comin', rushes comin'
Haunting me in your sweet embrace

Right back... in my mind
Oh yeah, right back
Right back... in my mind
Right back, pretty baby you do to me

Right back... in my mind
Right back
Right back, right back in my mind again

Right back... in my mind
Right back
Right back... in my mind
Right back...
