

This Time This Way

James LaBrie

Leonardo: Calling out to you
I know you're listening
I've spent the last year in Milan
I haven't heard from you
Did my letters make it there?
I need to ask you, is something wrong?

Mona Lisa: My friend, I will say this good and loud,
"everything's all right"
I can't wait till I get back there
If I could, I would leave tonight
Leonardo:
This time I'm afraid to say it
This time there won't be words
This time, this day
I want our love a 'different way
'Have you ever felt that way before?
This time, this way
I'd like to be there when you say that you've always
known this day would come...
This time, this day
I want our love a 'different way'
Have you ever felt that way before?

Mona Lisa: It's what you hope to learn
But you'll never find the soul
'The rule and limits of everything'
You've reached the threshold of our human experience -
Divinity has drawn a veil
My friend,
I will say this good and loud 'everything's all right'
I can't wait till I get back home
If I could I would leave tonight
Are you listening?
Think I'll leave tonight.
Duet: This time, this way
You know the answer, so you say
We have always known this day would come
Let's just admit it now...
This time, this day
I'd like to be there when you say
Have you ever felt this way before?
This time, This way
You know the answer so you say
Have you ever felt this way before?
This time, this day
I'd like to be there when you say
Have you ever felt this way before?
This time, This way
You know the answer so you say
Have you ever felt this way before?
This time, this day
I'd like to be there when you say
Have you ever felt this way before?
This time, this way...
