

## New Face

James Marriott

You said I had a new face  
With more people taking note of it  
It's found it's own place  
The old one's more to your taste  
What else to say before you quit?  
I've got a new face

If it feels like I've changed  
Well I hope that I have  
Wouldn't do it for you  
Our story's on stage  
Over before it began  
Had it all thought through

From someone so close  
What went wrong for it to end like this?  
Had you been taking notes?  
Flip the switch, now the fault is all mine  
Cut the stitch, I'll be yours to design  
Don't be alarmed, wake me up before 9  
Hold me in your arms, tell me I'll be fine

The pain's there but the scars are all gone  
It ain't fair where the fuck did you come from?  
I'll show restraint until when we're all done  
But if you're here again well then you can come and get some  
Message now, and let's hope it falls flat  
Put me down, then go practice your a-act  
You're hearing sense and you're feeling attacked  
Falling on your friends well you are not all that

If it feels like I've changed  
Well I hope that I have  
Wouldn't do it for you  
I did it for her  
Our story's on stage  
Over before it began  
Had it all thought through  
You're not what you were
