

# Higher Than Here

James Morrison

Stay with me tonight  
Stay right by my side  
When I'm not in your light, it all fades to grey

Just keep holding on  
You're where I belong  
Whatever will become, we won't burn away

Oh I  
I'm gonna to be with you when the stars fall  
I'm gonna kiss away your midnight tears  
Take you higher  
Higher than here  
We should be standing in the sunlight  
I'm gonna to take you where the dark skies clear  
Somewhere higher  
Higher than here

I could tear you down  
Push you underground  
We're finding our way out to a better place

Oh I  
I'm gonna to be with you when the stars fall  
I'm gonna kiss away your midnight tears  
Take you higher  
Higher than here  
We should be standing in the sunlight  
I'm gonna to take you where the dark skies clear  
Somewhere higher  
Higher than here

Burn in to a hurricane  
Let the oceans roll  
Yeaahhh  
Cause the sky goes up in flames  
Let that love shine on  
Shine on  
Yeahh, yeahh

Oh I  
I'm gonna to be with you when the stars fall  
I'm gonna kiss away your midnight tears  
Take you higher  
Higher than here  
We should be standing in the sunlight  
I'm gonna to take you where the dark skies clear  
Somewhere higher  
Higher, higher, higher, higher, higher...  
Than here, eeeyeah
