

## 16B

James Reid

You keep me up all night  
Damn, I think I caught a vibe  
I might look alright  
But you fucked me up inside  
You know how to get me on  
Let's just have a little fun

But it never is, no  
Smoke from the bedroom window  
Gettin' lit for the hell of it  
Broke the bed a bit, woah  
I ain't finish yet  
Girl, come and get some  
She lettin' out stress  
Someone let her be  
So many things you got me feelin' right now  
I'll show you things you got me dreamin' about

No, I don't care what they say 'bout us  
You should know  
Every time you say  
"We're just having fun"  
I want you more, ooh  
I see the sun comin' up  
And I wish it was just going down  
I'm not talking 'bout love  
I'm not ready for that shit right now

You keep me up all night  
Damn, I think I caught a vibe  
I might look alright  
But you fucked me up inside  
You know how to get me on  
Let's just have a little fun, babe  
We can have a little fun, baby

Who said party's only for the weekends, yeah  
Who cares if we can party till the weekends, yeah  
I'm thinking maybe we just suck at being friends, yeah  
I'm thinking baby come on up to 16B  
No she don't wanna sleep with me  
She wanna go all night  
Bring out the freak in me  
Bump or grind, just be with me  
Hold that thought, made her scream  
Oh my God, but she means me

There's something about you  
I just can't explain it  
But I'm glad that you're staying  
Tell me all your favorite words  
I'mma spell it with my tongue  
Tell it to me girl, I promise I'mma get it done  
How did we get here with just a little fun?  
I'm not talking 'bout love  
But you got me feelin' shit right now

You keep me up all night  
Damn, I think I caught a vibe  
I might look alright  
But you fucked me up inside  
You know how to get me on  
Let's just have a little fun, babe  
We can have a little fun, baby, uh

No I don't care what they say 'bout us  
You should know, every time you say  
"We're just having fun"  
I want you more, ooh  
I see the sun coming up  
And I wish it was just going down
