

# Better With You

James

We float alone in darkness  
Suspended in space  
We float alone enchanted, timeless  
Reach out for you

Two streams pool into each other  
Two streams flow into one river  
Two streams drawn by the call of the blue

Two streams pool into each other  
Two streams flow into one river  
Two streams drawn by the call of the blue

Better with, better with you

All these lives refine us  
Define our truth  
We go out brief as sparklers  
My last touch  
Reach out for you

Two streams pool into each other  
Two streams flow into one river  
Two streams drawn by the call of the blue

Better with, better with you

If it all goes right  
We'll both be on that flight  
Drink in the northern lights  
As the planets consumed  
If it all goes right  
We'll both be on that flight  
Drink in the northern lights  
As the planet reblooms

Better, it's better with you  
Better with, better with, better with you  
Better with, better with, better with you  
Better with, better with, better with you

Better with, better with, better with you  
Better with, better with, better with you  
Better with, better with, better with you

A shooting star  
Is who we are  
Show me your magics (show me your magics)  
Show me your magics (show me your magics)

A shooting star  
Is who we are  
Show me your magics (show me your magics)  
Show me your magics (show me your magics)
