

Without a Doubt

Jamie Lawson

I didn't understand at first
Like secrets and the universe
The moth and the flame
Then you were there to help me work it out
Without a doubt

Maybe I was too far away
Another life, another day
When you came along
Reached inside and slowly pulled me out

Without a doubt in the world it's only
You and the boy that hold me now
Without a doubt

If ever there was destiny
It made sense when you came to me
The light in the dark
And now I know what this life's all about

Without a doubt in the world it's only
You and the boy that hold me now
Without a doubt

I didn't understand at first
