Jamie's Elsewhere

Digital dissonance  
Complicating every step  
First the right then the left  
Slowly sliding toward resolution  
The only way out

Subdivide and separate the things that I require  
Is this any way to live  
Unable to discern the avatar from the real?  
Is this any way to be defined  
Losing sync and bits inside the lines  
I might not make it back this time

Parameters I can't define

Deep inside a landscape of mesh and wire  
We all become one of the hive

A binary nightmare  
The system is collapsing  
A binary nightmare  
Unavoidable disaster

If we were designed to come undone so easily  
I have to believe we can be rebuilt until complete  
Redesigned from the inside

Subdivide and separate the things that I require  
Is this any way to live  
Unable to discern the avatar from the real?  
Is this any way to be defined  
Losing sync and bits inside the lines  
Is this any way to live  
Unable to discern the avatar from the real?  
Is this any way to be defined  
Losing sync and bits inside the lines  
I might not make it back this time  
I might not make it back this time

Redesigned from the inside  
Redesigned from the inside  
Redesigned from the inside  
Redesigned from the inside...
