

A new day  
The same subroutines  
Keep the chaos at bay  
Refine the programming

Correcting conflicting code  
Still sending out signals but nothing returns  
Daydreaming as a means of escape  
Counting hours but losing track of the days

If I could I'd run right through  
That open door inside my head  
To the place where sea meets sun and sky  
And lay there for a while

Stuck in a loop  
Unable to break it or find a way through  
Stuck in a loop  
Unable to break it or find a way through

Oh, the monotony!  
Crushed into foreign shape  
In the name of conformity  
Oh, the monotony!  
Crushed into foreign shape  
In the name of conformity

Degrading into discord  
Still sending out signals  
Shouting into the void  
Ground to dust by the day to day  
Counting hours but losing track of the days

If I could I'd run right through  
That open door inside my head  
To the place where sea meets sun and sky  
And lay there for a while  
If I could I'd run right through  
That open door inside my head  
To the place where sea meets sun and sky  
And lay there for a while

(Correcting conflicting code  
Still sending out signals but nothing returns  
Daydreaming as a means of escape  
Counting hours but losing track of the days)
