

The Night's Gonna Trick Me Again

Jamie Scott

Oh the nights gonna trick me again
I woke up believing you were here, my friend
Yes the nights gonna kill my soul
Cause only in the night we get to grow old
And all my life I was searching
To find you my love and we were learnin
But just up the hill the road was turnin
And I never saw you again

And tonight's gonna trick me the same
I wake up believing you were here again
Yes the nights gonna tear my soul
Cause only in the night we get to grow old
Sometimes it's so real I call your name
You're in my arms and you look just the same
The devil is playing a pretty rough game

Guess the nights gonna trick me again

And on every corner Ill be waiting
For you to trip and fall on me baby
Like you did the first time you saved me
Now all your love was dawn is breaking

And everyone's trying to write me things
But I wish that I could close the door this evening
And I'd let the world in
Or better still I'll just stop breathing

Cause sometimes it's so real I call your phone
Thinking maybe this time she's coming home
Cause I can't comprehend that you're really gone

Guess the nights gonna prove me wrong

And sure I know it's only pretend
But my hearts pretty empty without you here, my friend
And the night it makes me whole
Cause only in the night we get to grow old
Only in the night we get to grow old
