Take Me Away

Janet Jackson

Once upon a time was a dream that sounded crazy baby If fairytales are mine, you would be the one that saved me oh b aby Any time I visualize you, I'm in paradise It's you and me, thought you don't even know it So even with a million miles distance between us I know you'll be there to help me escape

Take me away from here To somewhere the air is clear Take me away from here To somewhere that love has no fear Go!

You'll always be that spy that was sent to save me From intimate danger The world's playin' my mind When I'm 'bout to lose it Boy you're the game changer Oh this silly heart of mine lost to a cutie pie He so turns me on, it keeps getting stronger Ooh I get a natural high just looking in his eyes So just hold me close, I'm waiting for you

Take me away from here To somewhere the air is clear Take me away from here To somewhere that love has no fear Go!
