Yeah You

Jann Arden

I take off I touch down I set sail I run aground I have one more for the road It's the only thing that's keeping me afloat I'm always gone, I'm never here Sometimes I want to disappear with you I'm choking on the atmosphere Cause all I want to be is near to you I lay down I wake up Fill another plastic cup I watch the news to fall asleep It's the only place I keep you I'll long to keep you here with me I'm sick and tired of moving around I wonder if I'm losing ground with you Afraid this love might dislocate If I can't go, if I can't stay with you I would give it all away I'm sick and tired of moving around Another show Another town I'm lonely when I'm not alone Cause I'm out here and you're my home Yeah, you Yeah, you Yeah, you Yeah, you I take off I touch down I set sail I run aground
