

Moonlight

Jarreau Vandal

I'm fascinated by the nightttime
The way it calls to me
The darker side of me uhh
And I'm addicted to the moonlight
When everyone's asleep
I'm wide awake and start to dream

No need to rush
Tell me where you wanna go
I feel like the world just opened
And everything we touch is gold
And it hurts to cry
And love is only what we see
And a friend of mine will realize
Almost like my heart starts to beat

White light up above take over me
Now I open up and feel your energy
Bright lights I look up
It's warning me yeah
I think I'll stay a while, I think I'll say a while

Surrounded by the feeling
It's cool just like the breeze
Flowing like the sea uhh
And I'm enamored by the skyline
You'll want to come with me
There's something I want you to see

No need to rush
Tell me where you wanna go
I feel like the world just opened
And everything we touch is gold
And it hurts to cry
And love is only what we see
And a friend of mine (friend of mine) will realize (will realize)
Almost like my heart starts to beat

White light up above take over me
Now I open up and feel your energy (uh)
Bright lights I look up (uh)
It's warning me yeah (yeah yeah yeah)
I think I'll stay a while (a while) I think I'll say a while (a while while while)

They always told me be careful what you consume
But really I feel safe in the haven that you produce
I would never doubt never leave me without a clue
[?] because baby know you the moon
Truth ain't hard to find when stars aline so properly
But tell me what's a star when you don't believe astrology

White light up above take over me
Now I open up and feel your energy
Bright lights I look up
It's warning me yeah (yeah yeah yeah)
I think I'll stay a while, I think I'll say a while
