

Exuberant Sputum

Jarrold Alonge

Uncontrollable hemoptysis
Lungs fill to the brim with blood
Septicemic, pneumonic, bubonic, you're done
Inhale the aerosol, dig your own grave
It enters your bloodstream with malice and hate
Bacterial infection of pulmonary tissue
Death within a day or two

Black death
Black death
Black death
Black death

Person to person, transmit disease
Woefully airborne, spawn of vile fleas
Yersinia pestis, beware the outbreak
With antiseptic measures, you can avoid the plague

Surgical mask
Wash, your, hands, with soap
Prevention is key

Millions of deaths
The living shall perish from the east to the west
Corpses consumed by legions of rats
A total pandemic, a scourge at last
Your speech is contagious
Your mouth is contagious
Your spit is contagious
Your face is contagious

Black death
Black death
Black death
Black death

Fuck!
