

High

Jarryd James

Bear witness to the wrong way about it
There's no way there was no pain
There was sacrifice no gain
Break my heart tell me there's no other way
Give a chance for the sinner, some too many
The broken heart to mend

When I'm learning that I
Never knew what it means to survive through
When the look in your eyes says more about me than about you

And we were high on, high on, high on love
Yeah we were high on, high on, high on love

Sing my heart out from everything I am
There's no way you'd understand
Now I'm under it again, ooh
Say my name like you never will again
Take a chance for the sinner
One's too many but the broken's got to mend

When I'm learning that I
Never knew what it means to survive through
When the look in your eyes says more about me than about you

When I'm learning that I
Never knew what it means to survive through
When the look in your eyes says more about me than about you

And we were high on, high on, high on love
Yeah we were high on, high on, high on love
Yeah we were high on, high on, high on love
Yeah we were high on, high on, high on love
Ooh
