## **One We Won't Forget**

**Jason Aldean** 

Got the visor down drivin' into the sunset Ain't come up on your dirt road turn yet This Chevrolet is 5 away Just enough time to burn half a cigarette Can't wait to see what's waitin' on me Behind that screen door I bet it'll be Somethin' I can't take my eyes off Somethin' you can't wait to show off Baby, this ain't no lay low kinda night I'm talkin' about When you get everything just the way you like it Come walkin' out we

Get these wheels rollin' down the road Find us a couple cold beers to hold Let that moonlight kiss your skin Like I'm about to do again and again Don't matter where we set the party down Underneath the stars or the lights of town In a car in a bar girl when this night ends Let's make it one of the ones we won't forget

You been soakin' up that sunshine all day Sendin' some hot little pictures my way Soakin' wet gettin' in my head Now you're in that dress and girl I can't wait to Take you out, spin you around Find somewhere to lay you down But the first thing we gotta do right now is

Get these wheels rollin' down the road Find us a couple cold beers to hold Let that moonlight kiss your skin Like I'm about to do again and again Don't matter where we set the party down Underneath the stars or the lights of town In a car in a bar girl when this night ends Let's make it one of the ones we won't forget

Baby, this ain't no lay low kinda night I'm talkin' about It's a missin' you all day kinda thing gotta make every second count when we

Get these wheels rollin' down the road Find us a couple cold beers to hold Let that moonlight kiss your skin Like I'm about to do again and again Don't matter where we set the party down Underneath the stars or the lights of town In a car in a bar girl when this night ends Let's make it one of the ones we won't forget Yeah, one we won't forget Yeah
