

# Insomnia

Jason Derulo

Stay up tonight  
Can't close your eyes  
You may miss the greatest moment of your life  
Bodies intertwine  
And shadows out of sight  
Don't wanna let the night burn up, yeah  
Maybe the sun will turn off  
Baby let's be nocturnal  
Keep each other awake forever  
Under the moon, eternal  
Making this love infernal  
And never see the day

I can be a vampire, you'll be mine  
Run from the daylight  
Together we stay right  
Stay away, awake all night  
Never say good night  
No good in goodbye  
No way, so you'll stay  
You'll lay awake

And you can be my insomnia  
You give me a love  
I'll stay up forever  
I can be your insomnia  
I'll give you a rush  
Stay sleepless together  
You can be my insomnia  
You give me your love, I'll stay up forever  
I can be your insomnia  
My touch is like a drug that keeps you away, wake

I touch divine  
So terrifying  
Scared to let the morning take this away  
Dawn will break it  
I know we'll make it  
'Cause in the dark is our safest haven  
Rocking, the stars are shining?  
Feels so good rewinding  
Keep'em outta sight

I can be a vampire, you'll be mine  
Run from the daylight  
Together we stay right  
Stay away, awake all night  
Never say good night  
No good in goodbye  
No way, so you'll stay  
You'll lay awake

And you can be my insomnia  
You give me a love  
I'll stay up forever  
I can be your insomnia  
I'll give you a rush

Stay sleepless together  
You can be my insomnia  
You give me your love, I'll stay up forever  
I can be your insomnia  
My touch is like a drug that keeps you away, wake

No way, never turn back  
Hurt me like a heart attack  
Acting like a maniac  
Be my love insomniac  
I'll bet, they'll never know  
One touch, I overdose  
So much I want some more  
So close

I can be a vampire, you'll be mine  
Run from the daylight  
Together we stay right  
Stay away, awake all night  
Never say good night  
No good in goodbye  
No way, so you'll stay  
You'll lay awake

And you can be my insomnia  
You give me a love  
I'll stay up forever  
I can be your insomnia  
I'll give you a rush  
Stay sleepless together  
You can be my insomnia
