

Save The Last Dance

Jason Derulo

Save the last dance for me
If your heart gets broken just bring it to me
Promise I'll be your last but not least
And when the party is over, you know where I'll be

Girl, I swear to love you when your hairs grey
Every single wrinkle on your face
Tryna figure out how you're still beautiful, oh, yeah
As years go by, I gain a little weight
And my vision starts to fade
I still see the best of me in you, you

Know you think that we are the same
Before your second thought and give your love away

Save the last dance for me
If your heart gets broken just bring it to me
Promise I'll be your last but not least
And when the party is over, you know where I'll be
Save the last dance
Save the last dance
For me

When you hit the club, you stressin' all night
And your favorite drink don't even taste right
When you're on your own, you got nobody to run to, to
Everything is gonna be alright
'Cause I've been waitin' my whole life
So I could come and love the pain out of you, you

Know you think that we are the same
Before your second thought and give your love away

Save the last dance for me
If your heart gets broken just bring it to me
Promise I'll be your last but not least
And when the party is over, you know where I'll be
Save the last dance
Save the last dance
For me
Save the last dance

Save the last dance for me
If your heart gets broken just bring it to me
Promise I'll be your last but not least
And when the party is over, you know where I'll be
Save the last dance
Save the last dance
For me
Save the last dance
Save the last dance
For me
