

Love Would Find a Way

Jason Donovan

I lost my heart
in her blue eyes
Don't ask me how
Don't analyse

But I was slowly captured by her spell
When she didn't wanna know me
I never gave up hoping

Love would find a way
Love would save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way

Across the room
I caught her eye
and time stood still
Don't ask me why

And I was surely captured by her smile
but what good did it do me
'cause she just looked right through me

Love would find a way
Love would save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way

Love would find a way
Love would save the day, save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way

And I was only waiting patiently
'til the day you came up to me
and said you thought you knew me

Love would find a way
Love would save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way

Love would find a way
Love would save the day, save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way

Love would find a way
Love would save the day, save the day
Nothing in the world
would ever stand in it's way
I believe love would find a way
