

Urgency

Jason Michael Carroll

I don't need your passing kiss in the hall
For I love you is when you call
Although they're nice to hear
What I need is to know you live and breathe
The way you did for me, for oh so many years

Yeah I need a little urgency
A need a lover, little less routine
A passion fashion for the silver screen
Yeah I need a little urgency
Show me something that's in between
Where we are and where we used to be
The love you gave that made me believe
Yeah I need a little urgency

People change and sometimes fall apart
But that's not where we are, we can still be saved
We are so used to the thought of me and you
Haven't thought of what we do
If it all ended today

Yeah I need a little urgency
A need a lover, little less routine
A passion fashion for the silver screen
Yeah I need a little urgency
Show me something that's in between
Where we are and where we used to be
The love you gave that made me believe
Yeah I need a little urgency

I know we've come too far to throw it away
But I need you to make me want to stay

Yeah I need a little urgency
A need a lover, little less routine
A passion fashion for the silver screen
Yeah I need a little urgency
Show me something that's in between
Where we are and where we used to be
The love you gave that made me believe
Yeah I need a little urgency
