Always Looking For You

Jason Mraz

The situation that we ended in
It was never not happening
Even the moments that we didn't win
They all comprised
A bigger picture that we didn't see
Bringing me to you and you to me
Putting together every little piece
Before our eyes

I could use a little less worry
I could use a little more patience
I know it's all about the journey
But you're my destination

My heart was always open
Even when I didn't know it
Even when I didn't know who
I was always looking for you
Since I heard the word love
I have always been in search of
One to hold on to
I was always looking for you

I always was
I was always looking for you
I always will be

They say you know it when you see it
That it's more than just a feeling
But you're giving it a much deeper meaning
Which you redefined
Every long day working
Every single heartache hurting
Another year another lesson learning
I've realized

I shouldn't be in such a hurry
'Cause nothing's ever wasted
I know it's all about the journey
But you're my destination

My heart was always open
Even when I didn't know it
Even when I didn't know who
I was always looking for you
Since I heard the word love
I have always been in search of
One to hold on to
I was always looking for you

I always was
I was always looking for you
I always will be
I was always looking for you
I always was
I was always looking for you
I always will be

I was always looking for you

From the hopes of my childhood
Everything I ever wrote on this wildwood
You've been showing up in every tune
I've been looking for you
I always try to keep it visual
Even when you're teasing my peripheral
I won't stop because I've found you
I won't stop now

My heart was always open
Even when I didn't know it
Even when I didn't know who
I was always looking for you
Since I heard the word love
I have always been in search of
One to hold on to
I was always looking for you

I always was
I was always looking for you
I always will be
I was always looking for you
I always was
I was always looking for you
I always will be

I always was
I always will be
