

# Wilderness

Jason Mraz

Ooh...

Let's just get away tonight  
To a million star hotel outside  
Out of reach of radios, where the roads go quiet  
Where nobody knows, cause our phones go silent

Where we go  
Where there's life  
Far away from city lights  
Where there's only you and I

Let's just get away tonight  
And lie out underneath that cinematic sky  
And dream that we are stars among satellites  
Being who we are without having to try

Where we're going  
We'll be alright  
If we get cold we'd build a fire  
In the wild, you and I

We are wilderness  
Lets go dancing on the edge  
We are wilderness  
Free your animal within  
Life becomes amazing when you take in every breath  
And steal your heart from your head  
We are wilderness  
We are wilderness

Just like patience to the tree love is all we need  
To survive  
Out in the wild

We are wilderness  
Slow dancing on the edge  
We are wilderness  
Free our animal within  
Life becomes amazing when you take in every breath  
And steal your heart from your head  
We are wilderness, oh  
We are wilderness, oh

Life becomes amazing when you take in every breath  
And steal your heart from your head  
We are wilderness  
We are wilderness

Let's just get away tonight
