

Eclipse Me

Jason Reeves

Everybody stopped and stared
Oh my God, what a vision
And all the birds were silent
Stillness in the atmosphere
Peace on Earth for a minute
Even the sky was smiling

And I knew you were the one
When the moon covered the sun
All my lonely and my emptiness were done
You eclipse me with your love
You eclipse me with your love

A perfect circle made of fire
Temporary portal we could go through
Or maybe it's a halo
Well, that's the way I see your eyes
Might go blind looking at you
I'm never gonna say no

And I knew you were the one
When the moon covered the sun
All my lonely and my emptiness were done
You eclipse me with your love
You eclipse me with your love

And I knew you were the one
When the moon covered the sun
All my lonely and my emptiness were done
You eclipse me with your love
You eclipse me with your love
