

Galaxies

Jason Reeves

Daylight comes and my garden's growin'
I got the girl of my dreams in bed here
And I'm so grateful but it ain't showin'
Cause I'm overcome by imaginary fear

Cause lately it's just so hard to hold onto
Faith in anything
The future is looking dark as space
Without the stars and galaxies
And I tried seeing the bright side
Until it became insanity
Oh cause it's just so hard to hold onto
Faith in anything
But you and me
Galaxies

The world went mad and nobody noticed
Cause we're too lost in these digital mirrors
But what if we replaced them all with
Paintings from the distant future
When nothing's left of this masterpiece here

Cause lately it's just so hard to hold onto
Faith in anything
The future is looking dark as space
Without the stars and galaxies
And I tried seeing the bright side
Until it became insanity
Oh cause it's just so hard to hold onto
Faith in anything
But you and me
Galaxies

Imagine all the colors in the universe were gone
And someone turned the chandelier back on

Cause you make it easier to hold onto
Faith in everything
The future is looking bright as space
With all the lights and galaxies
And I tried seeing the dark side
But it was only flickering
Cause you make it easier to hold onto
Faith in everything
Like you and me
We're galaxies
You and me
We're galaxies
