

# Time

Jason Reeves

(We don't have very long)

When I heard the news it felt like novocaine  
And I tried to brace myself  
But nothing could've helped  
Me numb the pain

How in the hell did it happen?  
I never would've imagined  
Me here and you up in heaven

And I'm just left with all of the time  
We wasted thinking we had more of it  
But we didn't  
No, we didn't

I'd be lying if I said it's logical  
But the heart inside my head  
Still won't give up yet  
Cause miracles happen

What in the world is a body?  
Why are they so temporary?  
Is there a lesson we're missing?

I'm just left with all of the time  
We wasted thinking we had more of it  
Watching all the years fly by  
Busy in a life too intricate

God I only wish I could make all the bills go away  
Burn all the money we're dying to make  
Come over now to your house and just hang  
For a little while

Tryna get back all of the time  
We wasted thinking we had more of it  
But we didn't  
No, we didn't

And I don't wanna say goodbye  
Cause that word is way too delicate  
And I thought we could take our time  
Hoping that we both had more of it  
But we didn't  
No, we didn't  
No, we didn't  
We didn't
