

## holiday

Jax

Oh, it's Thanksgiving when you're giving me kisses  
And it's Christmas every time you say my name  
It's Halloween when you leave and it's New Year's Eve at night when you're next to me  
It's Easter Sunday when you're saying you love me  
'Cause your name ain't Patrick but you're still a saint  
And February 14th it don't mean a thing 'cause each day's a holiday

My world was black and white  
But now it's pumpkin spice  
And all my traffic lights are forest green  
Fireworks flying high  
When you're 4th of July  
And right there by my side, don't wanna sleep

Now the only question is your family or mine  
Saturday in LA and a new way on Sunday  
Only bar you're dropping is the one at midnight  
10, 9, 8

Oh, it's Thanksgiving when you're giving me kisses  
And it's Christmas every time you say my name  
It's Halloween when you leave and it's New Year's Eve at night when you're next to me  
It's Easter Sunday when you're saying you love me  
'Cause your name ain't Patrick but you're still a saint  
And February 14th it don't mean a thing 'cause each day's a holiday

Don't need a birthday cake  
My wish already came  
Blow out the candles every afternoon

Now the only question is your family or mine  
Saturday in LA and a new way on Sunday  
Only bar you're dropping is the one at midnight  
10, 9, 8

Oh, it's Thanksgiving when you're giving me kisses  
And it's Christmas every time you say my name  
It's Halloween when you leave and it's New Year's Eve at night when you're next to me  
It's Easter Sunday when you're saying you love me  
'Cause your name ain't Patrick but you're still a saint  
And February 14th it don't mean a thing 'cause each day's a holiday

Oh, it's Thanksgiving when you're giving me kisses  
And it's Christmas every time you say my name  
It's Halloween when you leave and it's New Year's Eve at night when you're next to me  
It's Easter Sunday when you're saying you love me  
'Cause your name ain't Patrick but you're still a saint  
And February 14th it don't mean a thing 'cause each day's a holiday
