

## neurospicy (interlude)

Jax

I might be a little spicy  
A little bit neuro spicy  
Isn't everyone a little bit spicy  
Spicy is better than bland

I have trouble with boundaries  
A spicy little ginger man found me  
He likes that I'm a little bit rowdy  
He holds my sweaty hand

My brain and mouth don't talk much  
They don't usually sync up  
So sometimes words I think of  
Are louder and faster than I planned

Einstein was a little spicy  
Newton was a little spicy  
Darwin, Edison, spicy  
Imagine if they started a band

It'd probably sound like

My doc says that I'm spicy  
But even she's a little bit spicy  
Isn't everyone a little bit spicy  
Spicy is better than bland

2 3 4

I might be a little spicy  
A little bit neuro spicy  
Isn't everyone a little bit spicy  
Spicy is better than bland
