

Enough

Jay Electronica

What if I what if I what if I told you
I know everything there is about loving you
She said what if I what if I what if I told ya
You've gotta lot to learn and you got a lot to lose
I said what do you what do you mean by that
I keep you fed keep a check and keep a roof
She said all that's fine but there's way more to me
But everything you said is all you need for proof

You think that you've done enough
You think that your loves enough
You think that you've done enough

You can taste the tears of Lot's wife flowing out my tear ducts
The sound of me not giving a fuck blowing out my earmuffs
Love ain't got nothing to do with it
You could ask Ike that
The heart seem like the perfect place for you to stick a knife
at
How come I gotta ask more times than you why is you like that
I went to see the man inside the mirror it was Mike Jack
It ain't my fault you couldn't see what you was looking at
True I gave you my heart but ultimately I took it back
It only takes a day to go from look at us to look at that
I told you there's no looking back
The brimstone is a falling
Any talk of how I did you wrong to folks would be appalling
Things got rocky and you doubted me like Adrienne and Pauly
Tranquilito
Sa acabo
I bid you fairly well
My turntables might of wobbled but they never really fell
Your love was conditional
So I'm back out on the ocean with dynamite inside my fishing bo
at

You think that you've done enough
You think that your loves enough
You think that you've done enough
